Surgical Anatomy Course in Ovarian Cancer: Comparing opinions of different Institutions

This project is supported by

 **Johnson & Johnson**
MEDICAL_{SpA}

Dear Colleague,

The European School of Abdomino-pelvic surgery in Gynecologic Oncology Esagon has firmly set its educational goals in the field of gynecologic oncology with the support of a permanent international faculty. Esagon aims to help all those who desire to maintain and improve their skills, through a network of teachers and students who periodically meet to discuss common issues, and to compare different approaches and philosophies.

We would therefore like to invite you to our upcoming two-day course. We have gathered key opinion leaders who will lecture on the management of ovarian cancer, draw comparisons between the different treatment approaches, and share their thoughts and ideas.

Once again, we have decided to open up our lecture hall and operating rooms to a wider and interactive audience. In order to obtain a more thorough view of what the general approach is to the management of this disease, we will be connected with centers that will be able to interact with our audience in Milan and provide us with their views and the approaches performed at their own institutions.

Hoping you will find this an interesting opportunity to exchange ideas and to join the Esagon network, we look forward to sharing this experience with you and to meeting you both personally and online!

Angelo Maggioni, Roberto Biffi

Programme

Thursday, 8th November

- 7.30 – 8 Registration
- 8.15 Welcome address
- 8.30 – 13 Live surgery
Clinical case presentation & ovarian cancer surgery
Surgeon: D Chi
- 13 Lunch
- 14 – 16 **Main Lecture**
Role of primary debulking surgery
