

Fecal Calprotectin

Stool should be passed spontaneously without the use of suppositories and/or laxatives. Discontinue astringents, activated charcoal and bismuth in the week preceding the collection.

Collection Procedure:

- Use sterile containers with a collection applicator.
- Collect a small amount of stool with the applicator and place it into the container without any preservative.
- The collected sample must be delivered within 24 hours of collection and should be kept at +2°C to +8°C.
